Let's get to work

Construction on the Tempe Streetcar Project began in June 2017. The 3-mile route will serve downtown Tempe, Arizona State University, the Rio Salado corridor and many Tempe neighborhoods.

The design contains:
- Off-wire operation through Downtown on Mill Avenue and gateway intersections
- 14 stops with two connecting to light rail stations at 3rd/Mill and Dorsey/Apache
- Primarily shared roadway with automobiles
- Ability to detour for major Tempe events

Valley Metro's first streetcar line represents a significant and valuable investment in the Valley’s future. Tempe Streetcar will provide the infrastructure needed to meet transportation needs, connect people to jobs and entertainment and offer another way to get around.

CONSTRUCTION ELEMENTS

Valley Metro and the Tempe Streetcar Project contractor, Stacy and Witbeck, will work through the following construction elements in an expeditious yet safe manner.

Utility Relocation and Street Work
This phase of construction includes relocation of utilities and constructing streetscape. Residents, businesses, and other adjacent stakeholders will be notified about temporary lane restrictions, nighttime work and occasional utility service disruptions, which may be required.

Stop Platform and Track Installation
During this construction phase, major streetcar infrastructure will be installed. Work will primarily take place in the roadway and in stop areas. Temporary traffic controls will be in place to ensure a smooth and safe flow of traffic.

System and Stop Finishes
These activities will include installation of shelters, art and landscaping and will mainly occur within the streetcar trackway and stop areas. Minimal lane closures and traffic restrictions will be needed during this phase of construction. Once complete, this work will conclude construction.

Vehicle Testing
Vehicle testing is the final step before the streetcar opens. Testing allows for a full inspection of the system, including track and overhead wire and operator training.

MINIMIZING IMPACTS

Valley Metro is committed to minimizing construction impacts and maintaining a safe environment. During construction, a Community Outreach Coordinator is assigned full-time to provide information to neighboring residents and business owners, address concerns and solve problems.

Information will be provided through personal contact, public meetings, door hangers, mailers, email and social media. To receive construction updates, contact the Community Outreach Coordinator below.

Business signage will be provided to help direct customers to driveways and entrances. Business owners can also take advantage of other business assistance programs offered by Valley Metro, the City of Tempe and community business partners. Please consult with your Business Assistance Coordinator listed below for more detail.

SAFETY TIPS

- Be alert around construction
- Allow for extra travel time
- Follow traffic signals and message boards
- Always use designated crosswalks
- Limit distractions such as cell phones and headphones
