1.0 INTRODUCTION

HDR Engineering, Inc. (HDR) was retained by Valley Metro Rail, Inc., now referred to as Valley Metro, to perform a Preliminary Initial Site Assessment (PISA) in support of the Gilbert Road Extension Environmental Assessment (EA). The PISA process utilizes a systematic investigation approach to identify potential hazardous materials sites that may affect a project. The Gilbert Road Extension PISA evaluates the impacts of a proposed two-mile easterly extension of the light rail transit (LRT) system from east of Mesa Drive (just east of North Edgemont) to the intersection of Main Street and Gilbert Road in the City of Mesa, Arizona. This report includes the evaluation of three alternatives: a No-Build Alternative and two build alternatives: Build Alternative (4-Lane) and Build Alternative (2-Lane). One design option is being considered for the Build Alternative (2-Lane) and is called the Build Alternative (2-Lane Roundabouts). This design option would incorporate modern roundabouts at several intersections along the route instead of typical traffic signals. The route of the build alternatives and design option is presented in Figure 1. For additional information about the project, refer to Section 2.2 of this PISA and Chapter 2 of the EA. Figures depicting the location of sites of concern identified during the PISA investigative process can be found in Appendix A. The following sections detail the purpose, the involved parties, the scope of work, and the limitations and exceptions associated with the PISA.

2.0 AFFECTED ENVIRONMENT

2.1 REGULATORY SETTING

The PISA is an abbreviated version of the ASTM E 1527-05 process, which provides a preliminary level of analysis. The PISA protocol has been developed and defined by the Arizona Department of Transportation (ADOT), and is often used as a screening-level approach to identify potential hazardous materials sites located along transportation corridors, or within a project area. The purpose of the PISA is to identify sites with potential hazardous materials impacts located adjacent to a project area, the Gilbert Road Extension in this case. The PISA is limited to a reconnaissance of the project area by an Environmental Professional (as defined in ASTM E 1527-05), supplemented by an electronic environmental database search. The PISA is therefore limited to observable conditions that indicate to the assessor whether the project area or adjacent sites offer sufficient risk to continue investigating in later steps. Alternatively, if sites that appear on electronic database search reports indicate hazardous materials impacts, the assessor may recommend further investigation. Historical research into the past uses of the project area, or past use of any property near the project area, is not included in the PISA step and is reserved for the next investigatory step, the Phase I Environmental Site Assessment (ESA). Onsite interview(s) and regulatory file reviews are also reserved for the ESA.
Because of the limitations inherent in the PISA scope-of-work (lack of historical research, interviews and regulatory file review), it does not conform to (and is not intended to conform to) the ASTM 1527 series of standards designed to codify content of Phase I ESA reports. The intent of the PISA is to provide screening-level data for the identification of major impacts (sites that may affect the build alternatives’ viability). For the purposes of an EA, the value of a PISA is in the ability to identify conditions that may constitute a “fatal flaw” for the project. The additional investigative steps of a Phase I ESA (including a corridor Phase I ESA study) allow the user to more adequately understand, and help reduce potential risks that may be encountered during the construction phase of a project. The Phase I ESA can also be used during property transfers / acquisitions, if conducted, as a method of risk reduction. Only the ASTM-compliant Phase I scope provides an adequate level of detail regarding past or potential releases to support specific mitigation measures. The City of Mesa will conduct a Phase 1 ESA for any property or right-of-way that will be acquired for the project.

2.2 STUDY AREA SETTING

The Study Area is bound by University Drive to the north, Broadway Road to the south, Gilbert Road to the east, and Mesa Drive to the west, in the City of Mesa, Maricopa County, Arizona (Figure 1). The Gilbert Road Extension extends the LRT east along Main Street to Gilbert Road a distance of two miles. It will connect with the 3.1-mile Central Mesa LRT Extension (CME) project where the CME is slated to end on Main Street (east of Mesa Drive near North Edgemont). Each of the build alternatives has the beginning and termination points in common. The difference in the Build Alternative (4-Lane) compared to the Build Alternative (2-Lane) is that the Build Alternative (4-Lane) preserves the existing four travel lanes on Main Street (two lanes in each direction) using the same cross-section dimensions as the existing LRT Starter Line. The Build Alternative (2-Lane) eliminates two through travel lanes (one in each direction) providing a total of two travel lanes. A design option for the Build Alternative (2-Lane Roundabout) could incorporate modern roundabouts at five street locations along the route to serve neighborhoods on either side of Main Street.

In addition, a park-and-ride facility will be provided at the eastern end-of-line station at Gilbert Road. Two options are considered for the park-and-ride: North option (northwest corner of Gilbert Road and Main Street) and South option (southwest corner of Gilbert Road and Main Street). Two Traction Power Substations (TPSSs) will also be required. One would be located at the end-of-line near Gilbert Road and one would be located approximately mid-way along the route (north side of Main Street, east of Stapley Drive). Two TPSS option sites are considered at the end-of-line, depending upon which park-and-ride option is selected for implementation.
2.3 PHYSICAL SETTING

The project area is located within the Basin and Range Physiographic Province of central and southern Arizona. The area is characterized by broad valleys between north-south-trending mountains of the province. The area is comprised of late and middle Pleistocene surficial deposits with alluvium in the broad basins generally underlain by thick sequences of coarse gravel, sand and silt. Deep alluvial basin fill potentially has been subject to agricultural, industrial and residential modification.

FIGURE 1: GILBERT ROAD EXTENSION AND STUDY AREA

3.0 PISA METHODOLOGY

For the performance of a PISA, HDR employs a relative risk ranking system (Low/Moderate/High/Indeterminate) that includes several investigation elements. Each element of the investigation process uses a different set of criteria to assess the risk of hazardous materials being present in association with a specific site or location. For a typical PISA scope of work, HDR uses the following investigation elements in arriving at the risk ranking for a given site.
3.1 ENVIRONMENTAL RECORDS REVIEW

HDR obtained an environmental database report prepared by Environmental Data Resources, Inc. (EDR). EDR specializes in searching geographically coded environmental records from state and federal environmental agencies with jurisdiction. HDR provided EDR with the Gilbert Road Extension location, and search parameters (radius of concern of at least one-half-mile). The database report contain maps, and a report of pertinent environmental records found for the specified area. This information source is limited in that reliable environmental records did not exist prior to approximately 1988, and not all sites (current or historic) have been identified by regulatory agencies. The EDR report for this project was produced on July 26, 2012 and is included as Appendix C.

3.2 SITE RECONNAISSANCE

HDR’s Environmental Professional (as defined in ASTM E 1527-05) is trained and experienced in identifying sites that may have the potential to adversely affect the subsurface through releases of hazardous materials to the soil or groundwater media. HDR performed a site reconnaissance of the project area (with collection of photographic documentation as presented in Appendix B). For this project, HDR conducted the site reconnaissance on July 30, 2012.

3.3 AERIAL PHOTOGRAPHY REVIEW

Although the history of a project area is not included in a PISA level of effort, HDR includes a review of aerial photographs when they are readily available. This data source provides an important verification step for sites identified through the other two investigatory tools. Aerial photographs from 1957 and 1970 were reviewed for this project.

3.4 RISK RANKING SYSTEM

Once the three elements of the investigation process have been completed, HDR categorizes any identified sites using a subjective risk ranking system, classifying the sites as low-risk, moderate-risk, high-risk, or indeterminate-risk. The following paragraphs provide general descriptions of each category.

Low-risk sites are those that have few indications of potential for release of hazardous materials. On some occasions, sites that have had a hazardous materials issue in the past but have been remediated with approval of the local state environmental agency or federal Environmental Protection Agency (EPA) may qualify as low risk. Examples of low-risk sites include undeveloped or agricultural property, residential property, or benign commercial properties such as office buildings, banks, or theaters.
Moderate-risk sites are those that have some indications of possible hazardous materials issues. A moderate risk site may appear on a database list as having a permit to handle hazardous materials, but has recorded no violations to date. Another way that a site could be interpreted as moderate risk would be if the environmental records search indicated no listing, but the site is an auto repair facility with visible surface staining. Examples of moderate-risk sites include auto repair garages, welding shops, or a vacant manufacturing facility with no listing in the environmental database report.

High-risk sites are those that have a high potential for releasing hazardous materials to the soil or groundwater, or have a recorded release issue. Examples of high-risk sites include current service stations, violation sites listed in the environmental database, or a known release such as the site of a train derailment with associated hazardous materials release.

Indeterminate-risk sites are those which, at the time of report preparation, did not include sufficient information to include a high, medium or low ranking. Indeterminate sites often require additional file review to determine the details of any related environmental issues at the site.

When HDR assigns a risk ranking to a site, the risk ranking criteria are reviewed and concurred with by at least one senior hazardous materials specialist. HDR understands that subjective criteria must be cross-reviewed for accuracy and adherence to our internal quality assurance standards.

4.0 POTENTIAL CONSTRUCTION IMPACTS

4.1 NO-BUILD ALTERNATIVE

No adverse impacts related to hazardous materials are anticipated as a result of the No-Build Alternative because this alternative only includes improvements to the transportation network that have already been approved and included in the Regional Transportation Plan, or improvements will be assessed by others, and appropriate measures would be included in those projects to avoid adverse impacts.

4.2 BUILD ALTERNATIVES

In order to identify potential impacts to the Build Alternatives, the PISA investigation for the Gilbert Road Extension project included a site reconnaissance, a review of environmental database searches, and a limited aerial photograph review. The results of each of these steps are presented below. The findings below apply to all Build Alternatives (4-Lane, 2-Lane and 2-Lane Roundabout). Where indicated, the results also apply to potential TPSS sites and the two park-and-ride locations.

4.2.1 Site Reconnaissance
A site reconnaissance of the project area and surrounding vicinity was conducted on July 30, 2012. The project area is located in an urban area of mixed use development, including retail and commercial properties, auto repair facilities, vehicle sales lots, restaurants, unoccupied buildings, hotels, medical plazas, vacant lots and former service/gas stations. No current gas stations were present along the Build Alternatives; however, indications of former stations were identified (fuel price signs/structures with the configuration of a former gas/service station). The locations of the park-and-ride options are currently occupied by a dental office, commercial facilities and restaurants (North option), and three auto sales and one auto/recreational vehicle (RV) sales businesses (some may contain possible repair/maintenance facilities onsite) (South option). The TPSS site option located east of Stapley Drive currently consists of a paved parking lot for a vacant clothing store. The eastern TPSS site options are located in the paved parking lots of a closed restaurant (North Option) and an auto/RV sales lot (South Option).

Several of the service/gas stations and drycleaners identified in the EDR report (see Section 4.2.2) were no longer present along the alignment. However, based on information included in the EDR database search, it is anticipated that numerous service stations and some drycleaners were previously located along the proposed alignments. Based on the likely presence of underground storage tanks (USTs) used in fueling operations at service stations, and the waste streams associated with drycleaners, both types of facilities are considered to be of concern, and pose potential construction impacts to the project. No pits, ponds, lagoons, disturbed ground, or other indications of large-scale hazardous material disposal were identified during the site reconnaissance. Photographic documentation from the site reconnaissance can be found in Appendix B.

4.2.2 Environmental Database Search

The computerized environmental database search was produced for the project area by EDR on July 26, 2012. The database report included federal, state, local, and tribal databases. The environmental databases searched included all databases required by the ASTM E 1527-05 standard, with search distances expanded to include the Build Alternatives, and the surrounding radius of concern of at least one-half-mile (up to one mile for select databases). Table 1 and the following paragraphs summarize the findings of the EDR report. For a detailed list of databases searched and figures depicting the location of each of the sites identified, please refer to the full EDR report included in Appendix C.

12 0

Dry Cleaners
Listings in the Dry Cleaners database are sites that have been identified by ADEQ as dry cleaning facilities.
4 2

EDR Historical Auto Stations
EDR has searched national collections of business directories and has collected listings of potential gas station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might include gas station/filling station/service station establishments.
22 14

EDR Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.
11 2

Total 189 48

The EDR report identified 189 environmental records for listings located along the project alignment, or within the radius of concern. Within an urban area it is anticipated that commercial operations will increase the number of listings in a database search. Many of the database listings, however, are not considered to be of concern to a project due to the scope of the project, the distance of the listed site from the alignment, and/or a facility’s lack of, or compliance with, any previously noted violation(s). Additional database findings are not considered to be of concern to the project due to the nature of the database. For example, incidents listed on the ERNS database are responded to by local emergency responders at the time of the incident, and often do not require further action.

As a result of these factors, 141 of the 189 records listed are not considered to be of concern to the project. The remaining 48 records are considered to be of potential concern, with potential to impact construction. The 48 records correspond to 19 sites identified in the federal and state/local regulatory databases, and 12 additional sites identified in the EDR proprietary databases (Historical Auto Stations, and Historical Cleaners). The discrepancy between the number of listings and the number of sites is a result of sites often being listed in multiple databases. These 31 sites are considered to be of concern for all of the Build Alternatives. Figures depicting the location of the 31 potential sites of concern are included in Appendix A. Each of the map codes noted below are for use with the figures in Appendix A.

The identified sites are considered to be of potential concern based on several factors. A site may be considered to be of potential concern based on an active or closed
Leaking Underground Storage Tank (LUST) case at the facility. Often, even after a LUST case has been closed, residual soil contamination may be encountered in the vicinity of the LUST during ground disturbing activities. Other contributing factors in the determination of risk include waste streams associated with facility operations (dry cleaners) or documented contamination onsite as indicated by a Superfund, Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS), or State Hazardous Waste Site (SHWS) listing. Information related to each of the sites listed in the federal, state and local databases is presented below.

Each of the following sites is considered to be high-risk:

- **Texaco #60-349-0097**, formerly located at 630 E. Main Street (map code B), is listed in the LUST database (three cases opened between 1990 and 1995, and closed in 1997) and the UST database (four tanks removed in 1991).
- **Alphagraphics Print Shops**, formerly located at 637 E. Main Street (map code C), is listed in the CERCLIS-No Further Remedial Action Planned (CERCLIS-NFRAP), and SHWS databases.
- **Action Tire**, formerly located at 755 E. Main Street (map code D), is listed in the LUST database (case opened in 1994 and closed in 1999) and the UST database (eight tanks permanently closed between 1988 and 1994). The site is also listed in the Historical Auto Stations database.
- **Lamro Plastic Engraving**, formerly located at 911 E. Main Street (map code F), is listed in the CERCLIS-NFRAP and SHWS databases.
- **Clare Cleaners**, formerly located at 920 E. Main Street (map code G), is listed in the CERCLIS-NFRAP, SHWS and Drycleaners databases. The site is also listed in the Historical Cleaners database.
- **Sherwood Car Wash**, located at 1060 E. Main Street (map code M), is listed in LUST database (three cases opened in 1993 and closed in 2007) and the UST database (three tanks removed in 1993). The site is also listed in the Historical Auto Stations database.
- **Crows Cleaners**, formerly located at 1460 E. Main Street (map code T), is listed in the Drycleaners database.
- **Minute Lube 1134**, formerly located at 1519 E. Main Street (map code U), is listed in the LUST database (case opened in 1995 and closed in 1999) and the UST database (three tanks removed in 1995).
- **Professional Playground Installers**, located at 1548 E. Main Street (map code W), is listed in the LUST database (case opened in 1995 and closed in 1996) and UST database (one tank removed in 1995).
- **Mobil 18**, formerly located at 1960 E. Main Street (map code AA), is listed in the LUST database (case opened in 1988 and closed in 1999) and the UST database (seven tanks removed between 1988 and 1992). This site is considered of concern to both park-and-ride location options.
• 7-Eleven #26201, located at 2010 E. Main Street (map code AB), is listed in the LUST database (case currently open, as of March 2012) and the UST database (three tanks temporarily closed onsite). This site is considered of concern to both park-and-ride location options.

• Chevron #9-8698, formerly located at 2011 E. Main Street (map code AC), is listed in the LUST database (six cases opened between 1986 and 1994, and closed between 1986 and 1996) and the UST database (four tanks removed between 1986 and 1990). This site is considered of concern to the park-and-ride South option.

• Robert Crist & Co., located at 2025 E. Main Street (map code AD), is listed in the LUST database (case opened in 1992 and closed in 1996) and the UST database (tank removed in 1992).

The following sites are listed in the UST database only. A site may also be considered of potential concern if a UST is (or was) located onsite. It has been the experience of HDR that subsurface contamination is often present near tanks not otherwise classified as a LUST. Based on the removal of the tanks from the site and the lack of any associated LUST listing, the following sites are considered to be moderate-risk.

• Reelee Property, located at 606 E. Main Street (map code A), is listed in the UST database (one tank removed in 2003). The site is also listed in the Historical Auto Station database.

• Sherwood Mesa Shopping Center, located at 1119 E. Main Street (map code O), is listed in the UST database (tank removed in 1990).

• Tune-Up Masters #617, located at 1205 E. Main Street (map code Q), is listed in the UST database (tank removed in 1989). The site is also listed in the Historical Auto Stations database.

• Western Auto Supply Co., formerly located at 1403 E. Main Street (map code S), is listed in the UST database (tank removed 1990).

• Zions First National Bank, formerly located at 1858 E. Main Street (map code Y), is listed in the UST database (tank removed in 1990).

• Texaco #60-340-0098, formerly located at 1959 E. Main Street (map code Z), is listed in the UST database (five tanks removed in 1999). This site is considered of concern to the park-and-ride South option.

The following 10 sites are listed in EDR’s proprietary Historical Service Station database. (Four additional sites identified above are listed in other databases, as well as the Historical Service Station database). Without the presence of other supporting regulatory information (such as a UST listing), each of the following sites is considered an indeterminate-risk. The sites are listed with facility names and addresses as reported in the EDR report.

• Sunset Service Garage (listed in 1960) located at 856 E. Main Street (map code E).
Kollings Auto Service (listed in 1965) located at 20 S. Miller Street (map code H).
El Portal Service Station (listed in 1960) located at 1007 E. Main Street (map code I).
Village Auto Electric Generator Repair (listed in 1952) located at 1024 E. Main Street (map code J).
Martins Richfield Service Station (listed in 1960) located at 1049 E. Main Street (map code K).
Sharks Union Oil (listed in 1960) located at 1118 E. Main Street (map code N).
Bills Wheel and Alignment Service (listed in 1965) located at 23 S. Lazona Drive (map code R).
Neihart Humble Service Station (listed in 1960) located at 1534 E. Main Street (map code V).
Madsons Auto Repair Rear (listed in 1965) located at 1628 E. Main Street (map code X).
Max’s Auto Service (listed in 1960) located at 1961 E. Main Street (map code Z).

This site is considered of concern to the park-and-ride South option.

The following two sites are listed in EDR’s proprietary Historical Cleaners database. One additional site identified above is listed in other databases as well as the Historical Cleaners database. Without the presence of other supporting regulatory information (such as a DRYCLEANERS listing), each of the following sites is considered an indeterminate-risk:

- Ideal Cleaners (listed in 1960) located at 1042 E. Main Street (map code L).
- Savway Valet (listed in 1965) located at 1134 E. Main Street (map code P).

### 4.2.3 Historic Aerial Photography Review

Two images of the Gilbert Road Extension project area were reviewed for the purposes of the PISA, one from 1957 and one from 1970. The western portion of the project area from North Edgemont to about Stapley Drive was developed with commercial, retail, and residential development dating back to the late 1950s. From Stapley Drive and extending east, some agricultural land and undeveloped areas were present in 1957. By 1970, the development throughout the project area had expanded, particularly in the eastern half where commercial, retail or residential properties replaced the agricultural fields. Much of the project area’s current development was present by 1970.

### 5.0 FINDINGS

The following presents a summary of findings associated with the PISA performed for the Gilbert Road Extension project:
The Build Alternatives for the Gilbert Road Extension are located in Mesa, Maricopa County, Arizona. The alternatives extend the LRT east along Main Street to Gilbert Road, a distance of two miles. It will connect with the 3.1-mile CME project where the CME is slated to end on Main Street (east of Mesa Drive near North Edgemont).

The project area is located in an urban area of mixed use development, including retail and commercial properties, auto repair facilities, automobile and RV sales lots, restaurants, unoccupied buildings, hotels, medical plazas, vacant lots and former service/gas stations.

A review of the EDR report identified 31 sites considered to be of concern to the Build Alternatives. The sites include former service stations, drycleaners, and areas of known contamination as defined by the EPA. The sites are located throughout the entire length of the Gilbert Road Extension project.

Five of the sites identified in the EDR report are considered of concern to the North and/or South park-and-ride option(s).

6.0 CONCLUSIONS

HDR has performed this PISA in general conformance with the scope and limitations of described above. The findings and conclusions of this PISA pertain to the Build Alternatives, potential TPSS locations and park-and-ride options for the Gilbert Road Extension.

The risk of environmental impacts from hazardous materials sites in the immediate vicinity of the Build Alternatives is moderate to high, based upon the history and environmental impacts associated with identified sites of concern. The amount of subsurface disturbance for the project is expected to be low to moderate, according to the anticipated scope of work for the light rail project.

7.0 RECOMMENDATIONS

The purpose of the PISA investigation is to determine whether sufficient risk exists from sites located near the project area to warrant further investigation under a subsequent, more detailed Phase I ESA. This determination depends upon two factors: 1) the risk of environmental impacts associated with the sites identified during the PISA, and 2) the amount and location of subsurface disturbance likely to be associated with the proposed scope of work for the project.

Based upon the moderate to high risk of impacts from the identified sites of concern, the concentration of sites located throughout the length of the project area, and the amount of ground disturbance planned for the project, HDR recommends a corridor Phase I ESA be conducted for the length of the Gilbert Road Extension. This recommendation is applicable for all of the Build Alternatives. For the purposes of an EA, the value of a PISA is in the ability to identify conditions that may constitute a “fatal flaw” for the
project. With the addition of the historical resource review, regulatory file review and interview steps that are included in a corridor Phase I ESA, the project area can be more thoroughly assessed. The additional investigative steps of a corridor Phase I ESA allow the user to more adequately understand, and help reduce potential risks that may be encountered during the construction phase of a project.

In the event of property acquisition, HDR recommends a site-specific Phase I ESA. The site-specific Phase I ESA can be used during property transfers/acquisitions as a method of risk reduction. Only the ASTM-compliant Phase I scope provides an adequate level of detail regarding past or potential releases to support specific mitigation measures. The City of Mesa will conduct a Phase I ESA for any property or right-of-way that will be acquired for the project.

HDR also recommends that during construction, all construction contractors should be instructed to immediately stop all subsurface activities in the event that potentially hazardous materials are encountered, an odor is identified, or significantly stained soil is visible during construction. Contractors should be instructed to follow all applicable regulations regarding discovery and response for hazardous materials encountered during the construction process. Note that Valley Metro will require the contractors to conform with METRO’s Master Specifications 01.35.30, Unknown Hazardous and Contaminated Substances which, in addition to stopping construction, requires specific procedures be followed in such an event.

8.0 LIMITATIONS

The environmental services described in this report have been conducted in general accordance with current regulatory guidelines and the standard-of-care exercised by environmental consultants performing similar work at the project area. No warranty, expressed or implied, is made regarding the professional opinions presented in this report. Please note that this study did not include an evaluation of geotechnical conditions or potential geologic hazards. This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Valley Metro should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document.

Our conclusions, recommendations, and opinions are based on an analysis of the observed site conditions and the referenced literature. It should be understood that the conditions of a site could change with time as a result of natural processes or the activities of man at the project area or nearby sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time, in part or in whole, by changes over which HDR has no control.
This report is intended exclusively for use by the client. Any use or reuse of the findings, conclusions, and/or recommendations of this report by parties other than the client is undertaken at said parties’ sole risk.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

**Federal CERCLIS NFRAP site List**

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/28/2011 has revealed that there are 6 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/15/2012 has revealed that there is 1 RCRA-SQG site within approximately 0.5 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 4 RCRA-CESQG sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states’ equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Quality’s ZipAcids database.

A review of the SHWS list, as provided by EDR, and dated 01/03/2000 has revealed that there are 6 SHWS sites within approximately 0.5 miles of the target property.

**State and tribal registered storage tank lists**

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Quality’s Arizona UST-DMS Facility and Tank Data Listing by City database.

A review of the UST list, as provided by EDR, and dated 04/09/2012 has revealed that there are 31 UST sites within approximately 0.5 miles of the target property.

State and tribal institutional control / engineering control registries
AZURITE: ADEQ maintains a repository listing sites remediated under programs administered by the department.

A review of the AZURITE list, as provided by EDR, and dated 06/07/2012 has revealed that there are 2
AZURITE sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

SPILLS: The ADEQ Emergency Response unit documents chemical spills and incidents that are referred to the Unit. The logbook information for 1984-1986 consists of handwritten entries of the date, incident number and name of facility if known. Current logbooks are computerized and can be sorted by date, incident number, name, city (zip codes are not included), county, chemical and quantity. The sources is the Department of Environmental Quality’s Hazardous Material Logbook.

A review of the SPILLS list, as provided by EDR, and dated 11/15/2001 has revealed that there are 12 SPILLS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 03/15/2012 has revealed that there are 15 RCRA-NonGen sites within approximately 0.5 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 10/23/2011 has revealed that there are 65 FINDS sites within approximately 0.5 miles of the target property.

MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the MANIFEST list, as provided by EDR, and dated 12/31/2007 has revealed that there are 5 MANIFEST sites within approximately 0.5 miles of the target property.

DRYCLEANERS: Drycleaner Facility Listing.

A review of the DRYCLEANERS list, as provided by EDR, and dated 01/20/2006 has revealed that there are 4 DRYCLEANERS sites within approximately 0.5 miles of the target property.

Dry Wells: Drywell is a bored, drilled, or driven shaft or hole whose depth is greater than its width and is designed and constructed specifically for the disposal of storm water. The source is Arizona’s Department of Environmental Quality.

A review of the Dry Wells list, as provided by EDR, and dated 05/25/2012 has revealed that there are 30 Dry Wells sites within approximately 0.5 miles of the target property.

EDR PROPRIETARY RECORDS

EDR Proprietary Records
Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR’s researchers. Manufactured gas sites were used in the United States from the 1800’s to 1950’s to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there is 1 Manufactured Gas Plants site within approximately 1 mile of the target property.

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 22 EDR Historical Auto Stations sites within approximately 0.5 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AZURITE (Arizona Unified Repository For Informational Tracking Of The Environment) is the Arizona Department of Environmental Quality (ADEQ) database that is used for environmental enforcement and compliance reporting to the Permit and Compliance (PCS) system and to the Air Facility System Universal Interface (AFS-UI).

RAYS NORGE VILLAGE (Continued)

Facility name: RAYS NORGE VILLAGE
Classification: Small Quantity Generator

Violation Status: No violations found

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

Historical Generators:
- Date form received by agency: 10/16/1987
- Facility name: RAYS NORGE VILLAGE
- Classification: Small Quantity Generator
- Violation Status: No violations found

- Registry ID: 110002577097

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AZURITE (Arizona Unified Repository For Informational Tracking Of The Environment) is the Arizona Department of Environmental Quality (ADEQ) database that is used for environmental enforcement and compliance reporting to the Permit and Compliance (PCS) system and to the Air Facility System Universal Interface (AFS-UI).

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AZURITE (Arizona Unified Repository For Informational Tracking Of The Environment is the Arizona Department of Environmental Quality (ADEQ) database that is used for environmental enforcement and compliance reporting to the Permit and Compliance (PCS) system and to the Air Facility System Universal Interface (AFS-UI).

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: LEAD

A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS
CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A
CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN
OR DEGREADE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS
USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN
 THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE
DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Facility System Universal Interface (AFS-UI).**

**Report:**

The report includes information on facilities such as LAZY J QUICK CLEAN CENTER and their associated data including Facility ID, EPA ID Number, and Site Elevation. The database used for environmental enforcement and compliance is the Arizona Unified Repository for Informational Tracking (AZURITE) and the Arizona Department of Environmental Quality (ADEQ) database.

**Leak Priority:**

Leak Priority is indicated for each facility, with details such as Leak Number, Leak Priority, Date Closed, and Notification.

**EDR Historical Cleaners:**

EDR Historical Cleaners provide information on the year and type of facility, including Name, Type, and Year.

**Registry ID:**

Registry ID is provided for each facility, facilitating the tracking and management of environmental data.

---

**Environment:**

The environment is described as the Arizona Department of Environmental Quality (ADEQ) database that is used for environmental enforcement and compliance reporting to the Permit and Compliance (PCS) system and to the Air Facility System Universal Interface (AFS-UI).

### Relative: Lower

**Actual:** 1240 ft.

**RCRA-NonGen:**
- Date form received by agency: 04/17/2008
- Facility name: HAWKES DISCOUNT RADIATOR
- Facility address: 710 E BROADWAY RD
  - MESA, AZ 85204-2081
- EPA ID: AZD983481110
- Contact: TERRY STEWART
- Contact address: NO ADDRESS ON RECORD
- Contact country: Not reported
- Contact telephone: (623) 478-9960
- Contact email: Not reported
- EPA Region: 09
- Land type: Facility is not located on Indian land. Additional information is not known.
- Classification: Non-Generator
- Description: Handler: Non-Generators do not presently generate hazardous waste

#### Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

#### Historical Generators:
- Date form received by agency: 02/14/2008
- Facility name: HAWKES DISCOUNT RADIATOR
- Classification: Conditionally Exempt Small Quantity Generator

- Date form received by agency: 03/02/2006
  - Facility name: HAWKES DISCOUNT RADIATOR
  - Classification: Small Quantity Generator

- Date form received by agency: 12/30/2005
  - Facility name: HAWKES DISCOUNT RADIATOR
  - Site name: HAWKES RADIATOR
  - Classification: Large Quantity Generator

- Date form received by agency: 06/10/2005
  - Facility name: HAWKES DISCOUNT RADIATOR
  - Classification: Small Quantity Generator

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

AZURITE (Arizona Unified Repository For Informational Tracking Of The Environment is the Arizona Department of Environmental Quality (ADEQ) database that is used for environmental enforcement and compliance reporting to the Permit and Compliance (PCS) system and to the Air Facility System Universal Interface (AFS-UI).

Hazardous Waste Summary:

D001
IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

D002
A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

D003
A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BE WASTE GUNPOWDER.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**STANDARD ENVIRONMENTAL RECORDS**

**Federal NPL site list**

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.
Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/15/2012
Date Data Arrived at EDR: 04/04/2012
Date Made Active in Reports: 05/15/2012
Number of Days to Update: 41
Source: Environmental Protection Agency
Telephone: (415) 495-8895
Last EDR Contact: 07/02/2012
Next Scheduled EDR Contact: 10/15/2012
Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/15/2012
Date Data Arrived at EDR: 04/04/2012
Date Made Active in Reports: 05/15/2012
Number of Days to Update: 41

Next Scheduled EDR Contact: 10/15/2012
Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/15/2012
Date Data Arrived at EDR: 04/04/2012

Data Release Frequency: Varies
Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List
A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/30/2011
Date Data Arrived at EDR: 12/30/2011
Date Made Active in Reports: 01/10/2012
Number of Days to Update: 11

Source: Environmental Protection Agency
Telephone: 703-603-0695
Last EDR Contact: 06/11/2012
Next Scheduled EDR Contact: 09/24/2012
Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls
A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/30/2011
Date Data Arrived at EDR: 12/30/2011
Date Made Active in Reports: 01/10/2012
Number of Days to Update: 11

Next Scheduled EDR Contact: 09/24/2012
Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System
Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 04/02/2012
Date Data Arrived at EDR: 04/03/2012
Date Made Active in Reports: 06/14/2012
Number of Days to Update: 72

Source: National Response Center, United States Coast Guard
Telephone: 202-267-2180
Last EDR Contact: 07/02/2012
Next Scheduled EDR Contact: 10/15/2012
Data Release Frequency: Annually

State- and tribal - equivalent NPL

WQARF: Water Quality Assurance Revolving Fund Sites
Sites which may have an actual or potential impact upon the waters of the state, cause by hazardous substances. The WQARF program provides matching funds to political subdivisions and other state agencies for clean-up activities.

Date of Government Version: 06/01/2011
Date Data Arrived at EDR: 12/02/2011
Date Made Active in Reports: 01/05/2012
Number of Days to Update: 34

Source: Department of Environmental Quality
Telephone: 602-771-4360
Last EDR Contact: 06/01/2012
Next Scheduled EDR Contact: 09/10/2012
Data Release Frequency: Annually

State- and tribal - equivalent CERCLIS

SPL: Superfund Program List
The list is representative of the sites and potential sites within the jurisdiction of the Superfund Program Section. It is comprised of the following elements: 1) Water Quality Assurance Revolving Fund Registry Sites; 2) Potential WQARF Registry sites; 3) NPL sites; and 4) Department of Defense sites requiring SPS oversight.

Date of Government Version: 08/25/2004
Date Data Arrived at EDR: 12/03/2004
Date Made Active in Reports: 01/25/2005
Number of Days to Update: 53

State and tribal institutional control / engineering control registries

AUL: DEUR Database
Activity and use limitations include both engineering controls and institutional controls. DEUR and VEMUR sites.

DEUR: Declaration of Environmental Use Restriction. A restrictive land use covenant that is required when a property owner elects to use an institutional (i.e., administrative) control or engineering (i.e., physical) control as a means to meet remediation goals. The DEUR runs with and burdens the land, and requires maintenance of any institutional or engineering controls. VEMUR: Voluntary Environmental Mitigation Use Restriction. A restrictive land use covenant that, prior to July 18, 2000, was required when a property owner elected to remediate the property to non-residential uses. Effective July 18, 2000, the DEUR replaced the VEMUR as a restrictive use covenant.

Date of Government Version: 06/07/2012
Date Data Arrived at EDR: 06/07/2012
Date Made Active in Reports: 07/10/2012
Number of Days to Update: 33
Data Release Frequency: Varies

AZURITE: Remediation and DEUR/VEMUR Tracking System
ADEQ maintains a repository listing sites remediated under programs administered by the department.

Date of Government Version: 06/07/2012
Date Data Arrived at EDR: 06/07/2012
Date Made Active in Reports: 07/10/2012

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this
web site as a public service. It contains addresses of some locations where law enforcement agencies reported
they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites.
In most cases, the source of the entries is not the Department, and the Department has not verified the entry
and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example,
contacting local law enforcement and local health departments.

US HIST CDL: National Clandestine Laboratory Register
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

### PADS: PCB Activity Database System
- **PCB Activity Database.** PADS identifies generators, transporters, commercial storers and/or brokers and disposers of PCB’s who are required to notify the EPA of such activities.
- **Date of Government Version:** 11/01/2010
- **Source:** EPA
- **Telephone:** 202-566-0500
- **Last EDR Contact:** 07/19/2012
- **Next Scheduled EDR Contact:** 10/29/2012
- **Data Release Frequency:** Annually

### MLTS: Material Licensing Tracking System
- **MLTS** is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.
- **Date of Government Version:** 06/21/2011
- **Source:** Nuclear Regulatory Commission
- **Telephone:** 301-415-7169
- **Last EDR Contact:** 06/11/2012
- **Next Scheduled EDR Contact:** 09/24/2012
- **Data Release Frequency:** Quarterly

### RADINFO: Radiation Information Database
- The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.
- **Date of Government Version:** 01/10/2012
- **Source:** Environmental Protection Agency
- **Telephone:** 202-343-9775
- **Last EDR Contact:** 07/11/2012
- **Next Scheduled EDR Contact:** 10/22/2012
- **Data Release Frequency:** Quarterly

### FINDS: Facility Index System/Facility Registry System
- **Facility Index System.** FINDS contains both facility information and ‘pointers’ to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).
- **Date of Government Version:** 10/23/2011
- **Source:** EPA
- **Telephone:** (415) 947-8000
- **Last EDR Contact:** 06/12/2012
- **Next Scheduled EDR Contact:** 09/24/2012
- **Data Release Frequency:** Quarterly

### RAATS: RCRA Administrative Action Tracking System
- **RCRA Administration Action Tracking System.** RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.
- **Date of Government Version:** 04/17/1995
- **Source:** EPA
- **Telephone:** 202-564-4104
- **Last EDR Contact:** 06/02/2008
- **Next Scheduled EDR Contact:** 09/01/2008
- **Data Release Frequency:** No Update Planned

### BRS: Biennial Reporting System
- **The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.**

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.
EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR’s researchers. Manufactured gas sites were used in the United States from the 1800’s to 1950’s to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Historical Auto Stations: EDR Proprietary Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

EDR Historical Cleaners: EDR Proprietary Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.
Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

**CT MANIFEST:** Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

- Date of Government Version: 05/21/2012
- Date Data Arrived at EDR: 05/22/2012
- Date Made Active in Reports: 05/31/2012
- Number of Days to Update: 9
- Source: Department of Energy & Environmental Protection
- Telephone: 860-424-3375
- Last EDR Contact: 05/22/2012
- Next Scheduled EDR Contact: 09/03/2012
- Data Release Frequency: Annually

**NY MANIFEST:** Facility and Manifest Data
Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

- Date of Government Version: 05/01/2012
- Date Data Arrived at EDR: 05/09/2012
- Date Made Active in Reports: 06/14/2012
- Number of Days to Update: 36

**Oil/Gas Pipelines:** This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

**Electric Power Transmission Line Data**
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

**AHA Hospitals:**
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.
Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Facilities & Group Homes
Source: Department of Health Services
Telephone: 602-674-4220

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Riparian Vegetation Associated with Perennial Waters
Source: State Land Department
Telephone: 602-542-4094

Scanned Digital USGS 7.5° Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.
