WALKING AND BICYCLING IN THE ROUNDABOUT
Vehicles must yield to and wait for pedestrians and bicyclists using the roundabout crosswalks.
- When walking or biking in the roundabout, only cross at the designated crosswalks and look in both directions for oncoming vehicles and trains.

When entering the roundabout on a bike, remember:
- Exit the bike lanes in the designated areas and continue onto the sidewalks to connect to the crosswalks.
- Upon exiting the roundabout, use the bike lanes that continue on Main Street adjacent to the roadway.

Watch and listen for the following warnings of an oncoming train:

- Ringing of bells from the vehicular crossing gates
- Flashing electric train signs
- Flashing in-ground lights in the crosswalk

LARGE VEHICLES
The roundabout accommodates large transport vehicles, recreational vehicles and trailers. There are truck aprons at each intersecting street to allow for a greater turning radius.

Roundabout truck apron

EMERGENCY VEHICLES
If an emergency vehicle enters the roundabout, exit the roundabout as soon as possible. Don’t stop while in the roundabout.

If an emergency vehicle enters the roundabout while you are waiting for an oncoming train, wait until after the train passes and the warnings have stopped, then exit the roundabout as soon as possible.

SAFETY TIPS
When traveling through the roundabout, remember to:

- Slow down, follow traffic signs and yield to oncoming traffic.

- Only cross at the intersection and look for oncoming vehicles and trains.

- Ride in designated bike lanes, use sidewalks where indicated and look for vehicles and trains before entering the crosswalk.

As part of the Gilbert Road Light Rail Extension, a roundabout will be built at Main Street/Horne. The roundabout is designed to help traffic flow smoothly and safely.

**DRIVING IN THE ROUNDBOX**

When entering the roundabout, remember to:

- Slow down or yield to traffic approaching from the left
- Carefully proceed into the roundabout when it is safe to enter
- Choose the appropriate lane

As a train approaches the roundabout, lights will flash, bells will activate and crossing gates will come down. Drivers wishing to cross the light rail tracks must wait until after the train passes and the warnings have stopped.

Eastbound and westbound traffic on Main Street will continue as the train crosses through the intersection.

Northbound and southbound traffic on Horne will continue on Main Street when a train crosses through the intersection. Unless their direction of travel crosses the train tracks, then they will yield until after the train passes and the warnings have stopped.
