About the Project

Phase II of the Northwest Extension will extend light rail west on Dunlap Avenue from 19th Avenue, then north on 25th Avenue and across I-17 on Mountain View Road with a terminus on the west side of the freeway near Metrocenter Mall.

At the end-of-line, the Metrocenter Station will be the first elevated station in Valley Metro's light rail system. The existing Transit Center will relocate to below the elevated station. Adjacent to the transit center will be a four-story park-and-ride garage that will be accessible to the station.

PROJECT STATUS

- The Federal Transit Administration authorized the project to move into the Entry into Engineering phase, an important step towards securing federal grant funding.
- Coordination and collaboration with local area community groups, business owners and residents continues throughout the project corridor.
- By April 2020, project design will be complete.
- Underground utilities location and evaluation, along with infrastructure inspections is anticipated to be complete in April 2020.

NEXT STEPS

- Surveyors will start collecting property data in the corridor.
- A public meeting in summer 2020 will inform the public about the final project design, including public art concepts, and will include an overview of project construction activities.
- Project construction is anticipated to begin in August 2020.
- A workforce development program focused on education and career development related to the project will be launched in mid 2020.
